

ELAC The life of sound.

Discover power, performance and value.

While a handful of separates and integrated units offered great sound, none delivered the performance, flexibility and value essential for a product to carry the ELAC name. So where none existed before, the engineers started with a clean-sheet and simple design brief: build one of the most powerful, versatile, easy-to-use integrated amplifiers imaginable; do it without compromising sound, reliability and a great user experience; and price it so fairly that it becomes a hands-down choice, even when compared against units at many times the price.

Element Integrated Amplifier

ELAC Element series.

ELEMENT SERIES EA101EQ-G Changes the rules of engagement.

80 Watt-per-channel integrated amp with DSP

This integrated amplifier marks ELAC's return to the amplifier category. The Element Series EA101EQ-G Integrated Amplifier solves two of the biggest problems with two-channel audio: proper blending of a subwoofer with your main speakers and room correction. Our advanced DSP and innovative smartphone application provide all the tools necessary for anyone to achieve a true audiophile system at an affordable price.

The Element EA101EQ-G makes quite a statement and is guaranteed to change the rules of the game for integrated amplifiers, with sound quality and feature-rich control flexibility that make it the go-to solution for a no-compromise sound system. Once you experience what it can do—especially with the new Debut, Uni-Fi, or Line 240.3 loudspeakers—your world of sound just might be altered forever.

Element Series EA101EQ-G Specs

Power output: 2 x 80 Watts Continuous @ 4 ohms with 1% THD
Analog inputs: 2
Digital inputs: 3 total; 2 optical / 1 coaxial (192kHz 24-bit)
USB input: 192kHz 24-bit asynchronous
Subwoofer Output: 1
Headphone output: 1
Bluetooth audio with aptX
OEL Display
iOS and Android control app
Auto Blend feature (subwoofer to main speakers) with AutoEQ
Dolby Digital Decoding

Amplifier Features

Auto Blend and Auto EQ

The companion iOS and Android app measures the near-field response of main speakers and subwoofer, then pinpoints the subwoofer's optimal crossover frequency and correct phase. Auto Blend results in the perfect integration of clean, articulate bass. Auto EQ precisely tailors your system for flattest frequency response across the audio spectrum, optimized for your listening position and environment.

The BASH™ amplification solution

At their heart is a brand new BASH Tracking Amplifier delivering 80 Watts per channel into 4 ohms. This new amplifier uses a modulated switched mode power supply allied to a conventional class AB amplifier. Switching at more than 400,000 times per second, the supply tracks the incoming audio signal to ensure that the Class AB amplifier gets only

the voltage necessary (with a little headroom) to cope with today's dynamic movie and music content, thus maximizing the efficiency and potential of the amplifier.

App-rich control flexibility

ELAC's free iOS and Android app allows users to fully control and set up their system. The app includes innovative features not found on any other products in this class—anywhere.

Dolby Digital Decoding

To ensure the best possible sound reproduction the EA101EQ-G decodes Dolby Digital encoded content providing for compatibility with HDTV Broadcasts, Disc Media and streaming content.

Remote Learning

Using our free iOS or Android app you can teach the Element Series Amplifier to respond to your favorite remote control.

Input rename

Easily rename each input to match your source. The revised name will appear in the app and on the integrated amplifier's front panel display.

Bluetooth with aptX

To ensure the highest quality audio even when streaming from your bluetooth device, the EA101EQ supports aptX audio decoding providing up to CD quality sound when using an aptX phone, tablet, or PC.
